

TIPPERARY COMMUNITY LEARNING SPACES

Across Tipperary Community facilities are supporting E Learning and providing facilities to enable people attend college in a virtual capacity as required.

These community learning spaces provide a safe and comfortable environment and have WIFI to enable you to engage with college learning platforms. Students will provide their own laptop or tablet some community facilities may have printer facilities with local arrangements in relation to the use and cost for use of same. The intention of this promotion is to inform colleges and students of available student desks in the county from community facilities that will support the provision of desk space to enable the student attend their online classes. The student should directly engage with the community facility in their locality and determine availability, attendance requirements, Covid restrictions and costs associated with use of the community learning desks.
